

THE COMPANY

Melform, leader in the field of systems for transport of **perishable goods at controlled temperature**, is an Italian company, specialized in the study, engineering and production of **insulated and refrigerated containers** for the logistics and a wide range of trays and accessories for the Food service.

Melform boasts a highly qualified Technical Department able to study custom solutions for specific needs of storage and transport.

Melform is **synonymous of safety and quality**: the refrigerated containers Melform, known worldwide, meet the regulations, allow to work in HACCP environment and can be provided with the certification **APPROVAL ATP** and NF for road transport of perishable foodstuffs.

Company with ISO 9001:2008 certified management systems

THE COMPANY

EXPERIENCE

Melform, leader in the field of system for the controlled temperature transport for over 50 years, is an Italian company, specialized in the study, engineering and production of insulated and refrigerated containers for industrial Logistics and a wide range of trays and accessories for the Foodservice

TECHNOLOGY

The rotational molding technology allows to produce isothermal containers with a monolithic structure. The seamless structure (without sharp edges, joints or welds) grants an easy cleaning and sanitizing. A wide range of durable, sturdy trays are manufactured with the compression molding technology.

KNOW-HOW

Thanks to the experience and the advanced technology of Bonetto Group, the engineering area has been improved, consolidating the know-how in rotational and compression molding.

Furthermore, the commitment for the research and development set Melform brand one step ahead of its competitors

THE GROUP

Thanks to the experience and advanced technology of Bonetto Group, the engineering area has been improved, consolidating its know-how in rotational and compression molding.

BONETTO
GROUP

BIOMEDICAL SOLUTIONS

PORTABLE REFRIGERATORS

Portable refrigerators for laboratory samples, vaccines, organs, pharmaceuticals, chemotherapy and blood products.

- Accuracy and reliability
- Safety and tracking
- Between -30°C and $+40^{\circ}\text{C}$
- Unbroken cold chain

BIOMEDICAL LOGISTICS SOLUTIONS

- Multi-temperature loads on a single truck.
- RFID and USB datalogger.
- ATP certification.
- Hygiene, safety and no risk of cross contamination.
- Very low consumption.
- Dual power supply: 12 V d.c. / 230 V a.c.

BIOMEDICAL LOGISTICS SOLUTIONS

- Capacity from 20 to 160 liters.
- Customized features and accessories.
- Programmable temperature.
- Washable and cleanable.
- Ecofriendly.

HIGH CAPACITY CONTAINERS

UP TO 1300 LITERS

Cooling system version

Customizable: wheels, pallets, internal grids

Europallet
Internal/
external
dimensions.

THEY TRUST ON US:

- HACCP (Reg. CE 852/2004)
- UNI EN 12571
- ATP
- NF Hygiène Alimentaire
- A.D.R. Declaration
- CE Conformity
